Notes: - FDB package sizes for certain NDCs of Proventil and Vanceril were replaced with package sizes derived using implied package sizes from Medispan.

¹ "Spreads", (AWP - AMP) / AMP, were calculated as the weighted average of "spreads", calculated at the 11-digit NDC level, across all accused NDCs within a 9-digit NDC. At the 11-digit NDC level, "spreads" were calculated separately for each period during the calendar year during which neither the AMP nor the AMP had changed. These "spreads" were then aggregated over the calendar year and across 11-digit NDC "Gross Sales Activity in the AMP-Related Classes of Trade" (see Note 4).

"Accused Branded Products" include all Schering products on NDC list "DOJ NDCs.xls".

in Exhibit 6.

"Gross Sales Activity in the AMP-Related Classes of Trade" is defined as Total Gross Sales Activity, limited to the following classes of trade: 111, 121, 122, 123, 171, 172, 341, and 346. Total Gross Sales Activity is defined as direct sales with non-missing credit codes and contract sales from the indirect sales data. Gross sales exclude non-US transactions and transactions with either non-positive revenue or quantity.
